Negative Energy Plane:

Entering Negative Energy Plane - Ethereal8.mp3

Planar traits:

Color is drained by planar effects while on the Negative Energy Plane. Only black & shades of gray can be seen.

Creature can determine his own gravity (which is up & which is down).

Flight with wings does not work (only magical flight works).

No breathable air. If unable to breath = Suffocation

Torches & lanterns last half as long. Light spells work normal.

Clear vision (including Darkvision) limited to 5-ft. Further than that = Blinded

Minor Negative-dominant trait: living creatures within "islands" of the plane take 1d6 dmg per round. At 0 HP, crumbles into ash

Major Negative-dominant trait: living creatures outside "islands" of the plane make DC 25 Fort save per round or gain

Negative Level. If Negative Levels = ECL or HD, it becomes a Wraith.

(Attune Form, Protection from Negative Energy, Avoid Planar Effects, & Death Ward spells protect creature)

Negative Energy based spells are Maximized with no spell slot adjustment.

Gain +10 bonus on Negative Energy class abilities (Rebuking & Controlling Undead, ect) to determine HD affected.

Positive Energy based spells (Cure spells, ect) require spellcraft check (DC 15 + spell lvl) or the spell fails.

Suffer -10 penalty on Fort saves to regain negative levels from energy drain.
